

Denis Fedosov–Ledovskikh

denisfl@pm.me

I have been making web-services for more than fifteen years. This amount of time scares even me. But I love what I do and I am ready for new horizons.

Work experience

Frontend Developer at SimplexMobility

2020 – present

My areas of responsibility are implementing a design system and building UI. Helped to migrate from rest API to GraphQL, as a way to document API and share it. As a result, we migrated from old Bootstrap html components to modern and flexible user interface based on VueJS, improved speed of delivering features to production.

After joining the company as a developer, I first addressed urgent development-related tasks. Later, I helped improve communication between stakeholders, clients, and developers. As a result, the team became more responsive to critical issues, and developers gained a better understanding of business goals and objectives. Currently, I serve as a team lead for two teams of 5 people each.

Common stack: **Ruby on Rails, Vue.js, GraphQL.**

Frontend Developer at MediaInvest Company

Feb 2019 – Feb 2020

Maintained codebase of a dashboard for a number of regional news portals. Worked on improving user interface of the dashboard. Added computable css-variables themes for flexible customization of the visual part of online news titles. Migrated React components to Vue and then to NuxtJS.

Common stack: **Ruby on Rails, React, Vue.js, TailwindCSS, RESTful API.**

Frontend Developer at Transinet GmbH

Nov 2016 – Feb 2019

Maintained old codebase, helped to migrate from legacy code on Backbone and Marionette to Vue/Vuex. Divided a monolith application into microservices before it was mainstream.

I helped create and implement a plan to address technical debt within budget constraints.

Common stack: **Ruby on Rails, Backbone, Vue.js, RESTful API.**

Lead of frontend development team at WADA.vn

Nov 2015 – Nov 2016

Developed the project architecture. Supported and developed of new features, permanent improved UX based on A/B tests results. Provided optimization for Opera Mini.

Common stack: **The Vanilla JavaScript 🍷.**

UI Developer at Whisk (part of Samsung Next)

Jan 2016 – May 2016

Build a new project version based on ReactJS.

Common stack: **React.**

Early experience

2006 – 2014

It was a long time ago, and some things may have faded from memory. During this period, I worked as a freelancer with various companies. I started my career as a webmaster. I was hungry for tasks and thirsty for challenges (and still am!). As a freelancer, I tackled a wide range of tasks: developing websites from concept to finished product. I used ready-made CMS (MODx, Wordpress) and built websites from scratch using the CodeIgniter framework. I developed custom WordPress themes and actively participated in the development of the Russian-speaking WordPress community as a moderator.

During this period of my career, I can also mention my work at a web studio as a project manager. Joining the team as the only manager, over two years I managed to help the team grow twofold.

Education

Volgograd State University

Master, Physics and Informatics

Sep 2001 – Jun, 2006
